Frequently Asked Questions :

Helping to clear up very few concepts w.r.t Technological aspect & Integraff terms

Why move with Integraff?

Reasonable Pricing Plans to serve our services from small scale business to very large scale business.
Customized Development is the key to full fill the client requirements.
24*7 Customer Care Support

How to choose Application Development Plan?

Choose the plan as per your need and requirements.

- PLAN1 Static Website Design
- PLAN2 Dynamic Website Design
- PLAN3 E-Commerce Static Website
- PLAN4 E-Commerce Basic Application Software
- PLAN5 E-Commerce Standard Application Software

Is the Application Development Cost negotiable?

Money can't be an issue in our project concept because we provide pricing plans depending upon developing Technologies and Features to serve our services from small scale business to very large scale business.
More Application Features, more Pricing.
Higher the Technology Implementation, Higher the Price of Application.

Which Technology is used for an Application Development?

We have experts to handle application development in various technologies.
In this World, there are no of technologies to develop an application.
But the TECHNOLOGY which suits more to full fill the client requirements , usually we move ahead with that technology. The technology tools and environment using to develop an application always mentioned in the Project proposal for client acknowledgement.
More Application Features, more Pricing.
Higher the Technology Implementation, Higher the Price of Application.

Higher the Technology Implementation, Higher the Price of Application. Why?

Every technology having basic features and limits of operations.
But higher the technology, higher the possibilities of handling of limits or boundaries of operations or functions.

For example there is a difference between an android SAMSUNG Mobile Phone and Apple Mobile Phone w.r.t

Technological aspect but both are feasible in voice calling, video calling, conference calling, messaging etc. There is an issue regarding cost to implement higher technology as higher tools and environment are costly to purchase, costly to implement & costly to develop.

How to choose Developed Application YEARLY Maintenance Plan?

PLAN1 Yearly Updates available + upto 3 updates Customer Care Support / month
PLAN2 Yearly Updates available + upto 10 updates Customer Care Support / month
PLAN3 Yearly Updates available + 24*7 Customer Care Support

Is it mandatory to activate Developed Application YEARLY Maintenance Plan as free session is expired?

No, not yet.

Application is static or dynamic , in both cases application maintenance is required for periodic statistics updation which helps your application for smooth running along with features benefits which mentioned in above. If a client not willing take any Developed Application YEARLY Maintenance Plan , its upto his / her personal aspect of thinking. Our task is to give service / customer care support upto 6 months, as long as free session is valid. No Developed Application YEARLY Maintenance Plan, no charges applicable. If client not activated any YEARLY Maintenance Plan and later found difficulties in handling then either client can renew the YEARLY Maintenance Plan else can pay instantly for that particular issue which is fixed.

In Static/Dynamic Website what for the 7 pages?

1st Page – Home Page , 2nd Page – About Us , 3rd Page – Services/Products , 4th Page – Services/Products , 5th Page – Contact Us,6th Page – Career , 7th Page – Gallery

*** Note: The alteration of page is possible as per client need and requirements.

Extra Page development cost \$5/Page

There is a limit of products design for E-Commerce Static Website - 25 Products , Basic E-Commerce Application – 50 Products, Standard E-Commerce – 100 Products. What will be the pricing if having more products?

Extra Product Page development cost \$5/Product

How much time taken to develop an application?

It's mentioned above depending upon application development plan chosen. We are trying our best to deliver in time .But since our development fully customized, we have to develop from scratch for a single implementation so if any technical issues found then only timeline will be increased and client will be already informed regarding.

In case of customized development, we can't hurry up .If you are in hurry in making your application development then it's not possible for us because we belief using quality time to give you quality product services.
